DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 drawn to detecting a buffer overflow attack, classified in class 726, subclass 22.
 - II. Claims 9-18, drawn to recovering an operation state of a processor from a buffer overflow attack, classified in class 726, subclass 26.

Inventions I and II are drawn to detecting a buffer overflow attack and recovering an operation state of a processor from a buffer overflow attack respectively are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that subcombination has utility by itself or in other combinations (MPEP § 806.05(C)).

2. Examiner made attempts to get a provisional election over the phone but did not result in an election being made. Examiner called and left messages to the phone number 202-783-6040 (dated 7/28/09 and 7/30/09).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
